

Approval of the Cayuga Indian Nation's Land-into-Trust Application Doesn't Make Cent\$....For Non-Cayuga Indian Nation Businesses!!!!

Listed below is a chart illustrating the effects that the Cayuga Indian Nation operations has had on one local business. The report below shows the total sales percentage fluctuations for cigarette sales since the week ending 9/28/08. As you can see, this business is experiencing 30 percent plus increases in sales when Cayuga Indian Nation businesses aren't operating. Similarly, you will notice the sharp decline in sales and revenue when the Cayuga Indian Nation is operating its tax-free enterprises. If the Cayuga Indian Nation trust application is approved, the Nation will have an economic advantage over competing businesses as a tax free commercial enterprise. The Cayuga Indian Nation's future business operations are unknown, yet since the Nation has purchased additional land it is likely that it will engage in business other than those it already operates.

How will your business fair if the Cayuga Indian Nation's application is approved?

How will your business be able to compete with a tax-free enterprise?

How can you protect your business?

Attend the BIA Hearing on June 17, 2009 to voice your concerns!!!!
